SUMMARY

Full-Stack Developer with production experience building real-time systems, scalable REST/WebSocket APIs, and payment workflows. Proven track record of shipping 6+ web and mobile applications with a strong foundation in algorithmic problem-solving and database optimization.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++, Python, HTML5, CSS3, SQL

Backend: Node.js, Express.js, RESTful APIs, WebSockets, Socket.IO, WebRTC, Microservices, JWT/OAuth

Frontend: React.js, Next.js, Redux Toolkit, Tailwind CSS, Sass, Responsive Design

Databases & Cloud: MongoDB, PostgreSQL, MySQL, Redis, AWS (EC2, S3), Docker, GitHub Actions (CI/CD)

Tools & Architecture: Git, Linux/Unix, Postman, Vercel, Render, System Design, Agile/Scrum

EXPERIENCE

Vizon Technolabs

Nov 2025 – Present

Software Developer

Remote

- **Full-Stack Client Delivery:** Engineered and deployed 4 production-grade platforms from scratch, including **Aarya Foundation** (aaryagaushala.com) and **Vanividhya** (vanividhya.org), streamlining digital workflows for client operations.
- **Full-Cycle Delivery:** Spearheaded development for **SK Foodz** and an internal **CCS Compliance Tracker**, driving both from requirements gathering to production release.
- **Backend Architecture & Optimization:** Architected scalable RESTful APIs secured with **JWT/RBAC** access control; optimized **MongoDB** indexing and aggregation queries, cutting data retrieval latency by **35%**.
- **Enterprise Systems Engineering:** Built internal tracking and yard management modules handling real-time logistical updates, multi-user concurrency, and secure data storage.

Aerion MedTech

Aug 2025 – Oct 2025

Software Development Intern

Remote

- **End-to-End Product Ownership:** Owned the software development lifecycle for the company's core web platform from scratch, managing UI/UX design, frontend engineering, backend hosting, and domain deployment.
- **Performance Optimization:** Engineered customized local client management tools and optimized application assets, achieving consistent **95+ Google Lighthouse** scores across performance, SEO, and accessibility.

KEY PROJECTS

ShopSphere (React, Node.js, Express, MongoDB, Razorpay)

[Live Demo](#) | [GitHub](#)

- Built a secure e-commerce system with idempotent payment webhook processing to prevent duplicate transactions, backed by JWT authentication.
- Added an asynchronous Cloudinary media pipeline that cut asset load times by **40%**.

Chatt (React, Socket.IO, Express, MongoDB)

[Live Demo](#) | [GitHub](#)

- Built a real-time messaging platform using bidirectional WebSockets, achieving sub-**50ms** event propagation latency across multi-user private rooms and broadcast channels.
- Implemented durable message persistence in MongoDB, ensuring message history survives reconnects and session drops.

MealFit (React Native, Expo, TypeScript, Node.js, MongoDB)

[GitHub](#) / [APK](#)

- Architected an India-first nutrition platform with a modular monolith backend and a dynamic Mifflin-St Jeor TDEE calibration engine.
- Built a Rs.40–Rs.250/day linear budget optimization algorithm and real-time health diagnostics with sub-100ms DB ping monitoring.

UrbanOasis (React, Node.js, Express, MongoDB)

[Live Demo](#)

- Developed a commercial salon booking ERP with atomic slot reservation locks to prevent double-booking race conditions.
- Added dynamic service indexing and real-time analytics dashboards tracking daily operational metrics.

ACHIEVEMENTS & CERTIFICATIONS

- **Advanced Algorithmic Problem Solving:** Solved **2,000+ total problems** across LeetCode and CodeStudio, covering data structures, dynamic programming, graph theory, and optimized system execution.
- **Professional Certifications:** Data Structures & Algorithms in C++ and Full-Stack MERN Development, from Coding Ninjas and Udemy.

EDUCATION

Master of Computer Applications (MCA)

Aug 2024 – 2026

World College of Technology and Management, Gurugram (MDU Affiliated)

Bachelor of Computer Applications (BCA)

2020 – 2023

Maharshi Dayanand University (MDU), Rohtak
